PROFILE

Data Science final-year student skilled in statistics, data analysis, and machine learning Experienced in back-end development with NestJS to build scalable data-driven applications. Certified programming competitor with proven problem-solving and teamwork abilities. Passionate about applying data science to solve real-world problems and deliver actionable insights. Eager to contribute to innovative data science teams and grow technically and professionally.

PROFESSIONAL EXPERIENCE

Backend Developer - Geospatial Division, Q8MAPS 05/2025 – 07/2025
Remote

- Developed and maintained geospatial data services and APIs using Laravel and Remote PostgreSQL.
- Utilized PostGIS to handle spatial queries and geographic data processing
- Collaborated with frontend and GIS teams to integrate interactive, location-based features.
- Focused on clean architecture and scalable backend logic.
- Gained hands-on experience working with real-world spatial datasets and RESTful APIs.

EDUCATION

BSc in Computer and Informatics Engineering (specializing in Data Science & MERN Stack), Syrian Virtual University 01/2021 – Present
Damascus, Syria

Specialized in Data Science with practical experience in analytics, machine learning, and building data-driven web applications.

SKILLS

Data Science & AI (Machine Learning Deep Learning Statistical	Programming Languages (Python TypeScript JavaScript C# C++)
Modeling Data Visualization (Matplotlib, Seaborn) Data Wrangling & Cleaning	Big Data Tools (Pandas, NumPy)
AI/ML Frameworks & Libraries (TensorFlow Keras PyTorch scikit-learn XGBoost Hadoop)) LightGBM)	Soft Skills (Problem-solving Critical Thinking Collaboration & Teamwork)
Back-end Development (NestJS Node.js RESTful APIs Express.js Sql Server MySql PostgreSQL, Mongo DB)	Tools (Git Github GitLab Docker Postman)

LANGUAGES

- Arabic
- English

ORGANISATIONS

IT Support Assistant - SALI Team

2025 – Present

- Provided IT support and troubleshooting for volunteers and project teams.
- Assisted in project setup and account management.

Remote

PROJECTS

Advanced Backend System, *NestJS, PostgreSQL*

04/2025

Built a scalable backend supporting authentication, role-based access, product & review management, email verification, file uploads, and API documentation

TSP Project

01/2025

Developed a logistics solution using TSP, Dijkstra's Algorithm, and Genetic Algorithm to optimize delivery routes and minimize travel distance.

E-commerce Web Application, *(NestJS, PostgreSQL)*

08/2024

Created a full-featured e-commerce backend with user authentication, product management, orders, reviews, search/filtering, and role-based access control.

E-Learning Platform, *(Full Stack)*

Developed a comprehensive e-learning system with multi-role access, course management, student progress tracking, PayPal payments, and email notifications.

Sentiment Analysis on Social Media

Built a text analytics system using NLP techniques and sentiment scoring to classify social media posts as positive, negative, or neutral. Enhanced preprocessing with tokenization and TF-IDF vectorization.

Customer Churn Prediction

Developed a predictive model to forecast customer churn in subscription services using Gradient Boosting and Logistic Regression. Improved retention strategy by identifying high-risk users.

Fraud Detection System

Implemented a real-time fraud detection model using Random Forest and Logistic Regression. Evaluated precision, recall, and F1-score to identify fraudulent transactions in financial data.

Market Basket Analysis & Recommender System

Developed a system to analyze grocery transactions and identify frequently bought together items using Apriori algorithm and association rules. Built a recommendation function to suggest products based on purchase history.

CERTIFICATES

Completed Level 8 of the Top Notch course series at Dar Al-Son Institute

Data Analysis with Python
Qafzah Tech Learning

Machine Learning and Deep Learning
Qafza Tech

Analytic Data & SQL Certificate

programming competition
